Summary

As an ambitious university student, I am pursuing Bachelor of Science in Computer Science (Honours) at Aryabhata College, University of Delhi with a passion for coding and exploring new technologies, I am driven to continually expand my knowledge and skills. With experience working in several well-known libraries in both Python and Java, my interests lie in machine learning, data structures, and trading technologies. I am always eager to take on new challenges and grow in these areas. In my free time, I enjoy swimming and coding, and my GitHub profile, showcases some of my work.

Along with my proficiency in Python and Java, I am also familiar with CSS also Tailwind CSS , SQL, and C++.

As an added advantage, I am also familiar with Git on a basic level, allowing me to effectively collaborate and manage code repositories. Additionally, I recently pursued Ethical Hacking from IIT Kharagpur on the SWAYAM portal that made me enhance my skill set. As a major sector of interest, I feel it so interesting to work on the trading technologies.

I am an incredibly focused and goal-oriented individual who never gives up. I thrive on challenges and remain determined until I achieve my objectives. While I am passionate about learning and exploring new technologies, I also value the importance of taking time to enjoy my own peace and engage in quiet contemplation.

Education

University of Delhi

Bachelor of Science - BS, Computer Science

Nov 2022 - Present

Bal Bhavan Public School

Licenses & Certifications

Data Analysis using Python - Maitreyi College

Python - HackerRank

87096BA04ED4

 **Intermediate Machine Learning - Kaggle**

Java Data Structures & Algorithms - Infosys Springboard

Skills

Operating Systems • C++ • Electronic Trading • Front-End Design • Computer Science • MongoDB
• Data Analysis • Tailwind CSS • Python (Programming Language) • Java
